Non-Structural Metal Framing

Get the Telling Drywall Framing Advantage. Telling™ Industries manufactures a full complement of traditional drywall framing and accessory products for use in interior non-load bearing applications. Our drywall framing is roll-formed from hot-dipped galvanized steel, offering superior corrosion resistance.

The traditional drywall framing from Telling is available in a variety of web sizes and gauges. Our interior stud & track, as well as our angles, are knurled on the flanges.. This knurling offers speedy metal-to-metal and sheeting attachments and helps prevent screws riding or walking. We also have the ability to provide custom lengths, special packaging and markings upon request. Whatever the application and wherever the code, Telling has the right part for the job. Check out our Drywall Catalog for more information.

- **Web Sizes: 1.62", 2.5", 3.5", 3.62", 4.0", 5.5", 6.0"**
(8.0" is available in certain markets)
- **Flange: 1.25"**
- **Punch-Outs: 24" O.C. Standard**
 - ¾" Rectangle – for 1.62" and 2.5" Studs
 - 1 ½" x ¾" Key Hole Combo- for 3.5", 3.62", 4.0", 5.5" and 6" Studs

 - Custom punch patterns and spacing are available upon request
- **Track Legs: 1.25", 1.5", 2.0", 2.5", 3.0" and 4"**
(custom legs are available upon request)
- **Gauges, Mill thickness and Yield:**
 - 25 Ga./18 Mill- 33 KSI
 - 22 Ga./27 Mill- 33 KSI
 - 20 Ga./30 Mill- 33 KSI
 - 20-STR Ga./33 Mill- 33 KSI
- **Coating: G-40 Standard (G-60 and G-90 are available upon request)**

Telling is certified to handle any project. Telling's traditional gauge (SSMA) drywall framing meets or exceeds all applicable ASTM Standards for gauge, coating and form. Our stud and track products are backed by the prestigious International Code Council Evaluation Service Report ICC-ESR 2281 and are supported by the Telling Compliance Guarantee. We purchase all of our raw materials and manufacture all of our traditional framing to the letter of ASTM Standards.

- ASTM A653
- ASTM A1003
- ASTM C 645
- ASTM C 754

Take the LEED with Telling Drywall Framing, because Telling™ takes the LEED seriously. Our high-recycled content and three locations across the US will help qualify your projects for valuable LEED credits. Visit our LEED section for more details on earning LEED credits with Telling products.
