

TRUE-Rule TECHNOLOGY

Patent Pending

INTRODUCING TRUE-RULE TECHNOLOGY, A NEW PRODUCT INNOVATION FROM TELLING INDUSTRIES

Market Need:

- Some Metal Framing must be custom cut to length at the job site.
- The inaccuracy of stretching a tape measure across a metal framing component, marking it, then field cutting it can lead to undesirable length variation.
- If the length variation is too excessive, the field cut metal framing components may need to be scrapped and new pieces recut, resulting in higher material costs.

Solution:

- Telling has a Patent Pending invention to add ruler marking to metal framing stud & track.
- The ruler markings will be permanently applied via etching/embossing.
- The marking will be in $\frac{1}{4}$ ", $\frac{1}{2}$ ", 1", & 1' increments.
- Each Stud/Track would have approximately 2' of etched ruler marking.

NO MORE MEASURING TAPE! TRUE-RULE TECHNOLOGY MAKES CUTTING STUD AND TRACK A BREEZE!
