INTRODUCING TRUE-BRACE, A NEW PRODUCT INNOVATION FROM TELLING INDUSTRIES

True-Brace is used as mechanical bridging for studs. Typically, U-Channel or CRC, is attached to studs via clips or a weld to eliminate stud rotation and bending under wind or axial loads. 1-1/2” True-Brace is passed through the stud knockout and snapped securely into place with Telling’s patented technology saving valuable time and money.

True-Brace features an innovative, highly engineered design that securely locks the True-Brace into the stud slot hole without the need for clips or welding for most non-structural applications.

Features:
- Made of Galvanized Steel
- Highly Engineered for Secure Fit in Stud Knockout
- True-Brace Locks into the Stud without Clips or Welding
- Notches every 4” to accommodate 12”, 16”, 24” OC Stud Spacing

Benefits:
- Reduces Installation Time
- 10% Savings on Material and Labor Costs
- No Clips or Welding Required
- Easy Installation due to patented design

Traditional CRC channel installed with a clip

True-Brace installed

Innovative, Responsive Solutions for All Your Metal Framing Needs

Product Data:
- Available in galvanized steel meeting ASTM A-1003 or hot-dipped galvanized steel meeting ASTM A-653, G60.
- Lengths: 52” stock length. (Other lengths available in 4” increments).
- Patent # 10,309,107 (True-Brace), Patent # 10,508,446 (True-Bridge).

Uses:
- Bridging, (lateral support) in walls carrying axial and/or wind loads.
- Bracing studs at door bucks and furring for ceilings.
- Used in conjunction with metal lath and plaster in partitions, ceilings, column and beam enclosures, etc.
- Clips are not required for many non-load bearing applications.

Product Details

**True-Brace with self nesting geometry to fit one part inside of another and secured with a screw.**

**True-Brace locking features spaced every 4” to accommodate 12”, 16” and 24” on center stud spacing.**
