

# TRUE-Rule TECHNOLOGY

Patent Pending

**INTRODUCING  
TRUE-RULE TECHNOLOGY,  
A NEW PRODUCT INNOVATION  
FROM TELLING INDUSTRIES**

#### Market Need:

- Some metal framing must be custom cut to length at the job site.
- The inaccuracy of stretching a tape measure across a metal framing component, marking it, then field cutting or track and stud layout can lead to undesirable length variation and increased install time.
- If the length variation is too excessive, the field cut metal framing components may need to be scrapped and new pieces re-cut, resulting in higher material costs.

#### Solution:

- Telling has a patent pending invention to add ruler marking to metal framing stud & track to simplify field cutting and wall layouts.
- The ruler markings will be permanently applied via etching/embossing.

#### Product Info:

- Readily available on 30mil & 33mil traditional drywall studs at no upcharge.
- The marking will be in  $\frac{1}{4}$ "  $\frac{1}{2}$ " & 1" increments.
- Available upon request for 18ga & 16ga studs for a modest upcharge.
- Standard: 2ft of etched ruler marking.
- Upon request: etch entire length of stud for a modest upcharge.
- Track is coming soon!

**NO MORE MEASURING TAPE! TRUE-RULE TECHNOLOGY MAKES CUTTING STUD AND TRACK A BREEZE!**

**Innovative, Responsive Solutions for  
All Your Metal Framing Needs**
